ZEESHAN QASWAR

Senior Game Prototype Engineer | Unity / C# | Cocos Creator | Multiplayer & Rapid Prototyping

Pakistan | +92 302 8785870 | xeeshanqaswar@gmail.com | linkedin.com/in/zeeshanqaswar | zeeshanqaswar.com

PROFESSIONAL SUMMARY

Senior game engineer with 7+ years of experience building commercial, multiplayer, mobile and WebGL games. Independently developed playable game experiences spanning gameplay mechanics, player flows, UI, AI opponents, matchmaking and game-state management. Experienced with Unity/C#, Cocos Creator, fast game prototyping and AI-assisted development workflows using Claude AI, Antigravity, Codex, OpenCode and Unity CLI. Delivers end-to-end implementations, tests gameplay and iterates on technical and player experience challenges.

CORE SKILLS

Game Development & Prototyping: Unity, C#, Cocos Creator, playable prototypes, rapid prototyping, gameplay mechanics, game logic, turn-based games, player flows, mobile UI, ScriptableObjects

Multiplayer & AI: Photon Fusion, Photon PUN2, matchmaking, AI opponents, networked AI, authority models, game-state synchronization, host migration, tick-based input

Backend & Platforms: PlayFab, Firebase, REST/API integration, authentication, player profiles, inventory, leaderboards, Android, iOS, WebGL

AI-Assisted Development & Delivery: Claude AI, Antigravity, Codex, OpenCode, Unity CLI; AI coding agents, prototyping workflows, gameplay testing, profiling, Addressables, technical ownership

SELECTED GAME EXPERIENCE

Duel X | **Multiplayer Strategy Game** | *GENITEAM · 2020–2021*

- Independently developed a 2–4 player WebGL multiplayer math strategy game in Unity using Photon PUN2, PlayFab and Firebase; owned gameplay, player-facing UI, AI and multiplayer implementation.
- Implemented matchmaking, AI player filling, turn management and synchronized board state using Photon Master Client, PhotonView and RPCs.
- Tested gameplay on WebGL and Android, including simulated higher-latency networking conditions.

Jackaroo Masters | **Social / Board Game** | *TAPFIRE · 2024–2025*

- Owned Unity-side PlayFab and social systems integration for authentication, profiles, player economy, inventory, leaderboards and account linking.
- Integrated friend flows, invitations/matchmaking, chat and voice services and Firebase notifications; built a Unity–Cocos Creator/WebView bridge.

G.I. Joe: Wrath of Cobra | **Multiplayer Action Game** | *GENITEAM · 2021–2024*

- Led multiplayer engineering adaptation of an existing commercial gameplay codebase using Photon Fusion in a two-person networking team.
- Implemented synchronization for combat, health, scoring, pickups, projectiles, enemies, boss gameplay and networked AI; delivered host migration and disconnect recovery.

PROFESSIONAL EXPERIENCE

MINDSTORM STUDIOS | **Senior Software Engineer** | *Jun 2025–Present · Pakistan*

- Pro Golf: Architected and delivered a player-personalization system spanning inventory, purchases, API/DTO integration, asset cataloging and UI presentation.
- Used MVP, services, interfaces and dependency injection; optimized mobile memory and loading with Addressables-based progressive loading and preloading/unloading.

TAPFIRE | **Senior Software Engineer** | *Sep 2024–Jun 2025 · Pakistan*

- Jackaroo Masters: Delivered Unity-side social gameplay services, platform integrations and player account flows; coordinated interactions between Unity and an existing Cocos Creator application.

GENITEAM | **Development Lead** | *Sep 2021–Sep 2024 · Pakistan*

- Provided hands-on engineering leadership across Unity projects, including technical architecture, implementation, stakeholder collaboration and developer mentoring.
- SPACE: Led development of an iPad/iOS research experience with configurable experiments, spatial interaction rules, trial authoring and 16-language localization.
- Optimized UI, rendering, memory and platform behavior using profiling, Addressables, batching, LOD/CullingGroup and Xcode debugging.

GENITEAM | **Senior Software Engineer** | *Nov 2020–Sep 2021 · Pakistan*

- Duel X: Independently delivered core gameplay, AI, UI, matchmaking and multiplayer state synchronization for a playable Unity strategy title.

OZI TECHNOLOGY | **Unity Engineer** | *Jan 2019–Nov 2020 · Lahore, Pakistan*

- Developed gameplay systems and production features for shipped Android games, including Prison Escape Game, Special Ops and Xtreme Car Stunt Race Car Game.

INDEPENDENT / CONTRACT | **Unity & Unreal Developer** | *2018–2019 · Remote*

- Delivered Unity and Unreal projects for local and international clients, managing requirements, communication and implementation.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | University of Sargodha, Pakistan

PORTFOLIO

Project case studies: zeeshanqaswar.com | LinkedIn: linkedin.com/in/zeeshanqaswar

Playable game experience includes Unity and Cocos Creator. Some commercial playable builds and source links are not public due to employer confidentiality restrictions; shareable work samples and project details can be discussed upon request.
